The LOGISTEED Group has three strengths: Ability to accomplish operation, Advanced logistics engineering capability, and Global network. Drawing on our expertise and network accumulated over 70 years since our foundation as a logistics operator, we provide comprehensive logistics services with high level of safety, quality, and productivity.

The LOGISTEED Group’s Strengths

Value chain

Task analysis of the customers’ supply chain
Analyze supply chain issues based on data and interviews by communicating with customers

Design and proposal for advanced operation
Design and propose optimal site placement, delivery routes, transportation methods, and warehouse operations to customers based on analysis results

Flexible and reliable operation
Accomplish operation based on well-designed workflows, and strictly manage safety, quality, and productivity

Ongoing improvement of safety, quality, and productivity
Improve the productivity and quality of the entire organization through improvement activities reflecting customers’ feedback and employees’ opinions

The LOGISTEED Group’s strengths

- Conduct realistic analysis and identify issues, leveraging abundant experience in logistics operations as a leading 3PL company
- Close collaboration between sales representatives and logistics engineers familiar with the relevant industries
- Understand customer needs accurately through communication with customers
- Support customers’ supply chain reforms by using “SCDOS” which enable central management of customers’ supply chain information, visualization, analysis, and simulation
- Unique training program to develop data analysis experts

- Expertise and internal system to optimize site placement, plan distribution centers, design warehouse layouts, and establish warehouse workflows
- Design and develop high-performance warehouse management system (WMS) applicable to various sectors
- Design sustainable logistics by introducing advanced technologies and strategically working on sophistication and automation/labor-saving of logistics
- Design and provide smart warehouse combining automation/labor-saving expertise and digital technologies
- Use latest technologies and design one-stop service including carrying out, transportation, installation, and setting up of heavy machineries such as plant cargoes and machineries relating to social infrastructure

- 808 domestic and overseas business sites supporting global supply chain
- Operating structure capable of responding to changes in customers’ sales channels and environment flexibly and promptly
- Favorable and solid relationships with customers and partner companies
- Implement KPI-based strict control and improvement measures for profitability, safety, quality, and productivity
- Implement measures using technology for packaging and transportation jigs to improve transportation quality and reduce environmental load
- Secure safety, comply with laws and regulations and improve operational efficiency with “SSCV” using IoT technology

- Visualize the progress and good examples of improvement activities and spread improvement culture through group-wide “VC activities”
- Use logistics engineering capability and digital business platform to continuously improve transportation routes, warehouse layouts, and warehouse operation processes
- Provide various improvement educations and practice at workplaces
- Implement cross-departmental productivity reform by making full use of digital tools such as RPA and AI-OCR
- Provide guidance to improve driving skills by using “SSCV-Safety” which makes full use of IoT technology

Related solutions, tools, etc.

- SCDOS (Supply Chain Optimization Services)
- Develop data analysis experts
- SSCV (transport digital platform)
- SLC* (warehouse design support tool)
- EC platform (smart warehouse)
- RCS (resource control system)

*SCDOS: Supply Chain Optimization Services
*SLC: Smart Logistics Configurator
*SSCV: SSCV (transport digital platform)
*RCS: Resource Control System
*EC platform: EC platform (smart warehouse)
*RLC*: Integrated Resource Control System
*SSCV*: SSCV (transport digital platform)
