

Glossary

Intermodal transportation	Multimodal transportation combining different transport modes such as railroad, truck, aircraft, and ship, which enables to deliver cargoes in containers all the way to the final destination. Combining rail and ocean transportation for the trunk line transport is also expected to reduce environmental load.
UN Global Compact	A global framework aimed at realizing sustainable growth by encouraging companies/ organizations to exercise responsible and creative leadership and act as good members of society. It sets ten principles related to protection of human rights, elimination of unfair labour, response to environmental issues, and anti-corruption.
Circular economy	Economic activities that effectively use stock and create added value by creating new services while limiting the amount of resource input and consumption, in addition to the conventional Reduce, Reuse, Recycle (3Rs) initiatives.
Shared milkrun	Transportation method whereby one truck visits bases of multiple suppliers to collect production parts and deliver them to a production plant. It can not only improve transport efficiency and streamline the management of shipment receiving process at production plants but also contribute to solving environmental issues such as emissions of CO ₂ and air pollutants.
2024 issue	Collectively refers to various issues that might arise in the transport/logistics industry as a result of the application of the upper limit of overtime allowed for automobile drivers set by the Work Style Reform Act effective April 1, 2024. In particular, truck drivers' overtime will be limited to 960 hours per year.
ERP	Stands for Enterprise Resource Planning and refers to a system to enable sophisticated management by centrally managing the corporates' core functions such as production, procurement, inventory, sales, and accounting.
GDP	Stands for Good Distribution Practice and refers to appropriate distribution standard for medical supplies to ensure strict quality control. It is applied to the procurement, storage, and distribution processes of medical supplies after they are shipped to the market until they reach pharmacies, pharmaceutical distributors, and medical institutions.
RCS	Stands for Resource Control System, which is an integrated control system equipped with a work execution function that gives instructions to each equipment and worker based on the information on the operation status of the automated equipment and the work results of workers within the logistics center.
RPA	Stands for Robotic Process Automation and refers to software robotics technology that automates administrative work performed by a person using a personal computer. By registering operating procedures in advance, RPA can operate and run multiple systems just like a person does.

* Listed in Japanese or English alphabetical order

SCDOS	Stands for Supply Chain Design & Optimization Services and refers to the LOGISTEED Group's supply chain optimization services. They centrally manage and visualize customers' various supply chain data to support solving issues and strategy planning.
SSCV	Stands for Smart & Safety Connected Vehicle and refers to a transport digital platform that the LOGISTEED Group develops and provides to realize "sustainable transportation services" and "zero-accident society." It consists of three solutions of SSCV-Smart (order management, vehicle assignment management, and driving management), SSCV-Safety (safe driving management), and SSCV-Vehicle (optimization of vehicle management, failure prediction and preventive maintenance).
SWH	Stands for Smart Warehouse and refers to the Group's logistics center equipped with advanced technologies to pursue efficiency and flexibility. The EC Platform Center in Kasukabe, Saitama Prefecture, a shared automated warehouse for EC logistics, started operation in September 2019. We will combine automation/labor-saving expertise with digital technologies to provide services standardized for each industry in addition to EC logistics.
TCFD	Stands for Task Force on Climate-related Financial Disclosures. It recommends that companies, etc. disclose relevant information on their climate change initiatives that could have financial impacts on them under the four thematic areas of Governance, Strategy, Risk Management, and Metrics/Targets.
VAS	Stands for Value-Added Services and refers to the Company's logistics services and their peripheral operations in the customers' value chains of procurement/manufacturing/shipping/sales/service.
VC activities	Stands for Value Change & Creation and refers to daily improvement activities to implement the LOGISTEED WAY. Its aim is that the Company continues to grow and employees find their work rewarding. We are establishing an improvement culture through "visualization of improvement activities" and "cultivation of the culture of praise" such as exchanging ideas among employees under different themes and giving awards to excellent cases.
VMI	Stands for Vendor Management Inventory and refers to an inventory management system where suppliers manage customers' inventory level using the inventory information and shipping/sales information shared by customers.
VMS	Stands for Video Management Service/System, which is a system that centrally manages images recorded by multiple cameras.
WCS	Stands for Warehouse Control System, which is an automated control system to operate automated/labor-saving equipment at logistics centers.
