

Our Group Company Establishes a Logistics Center in Spain
– Consolidating Storage and Shipping Bases within Europe to improve Delivery Efficiency –

LOGISTEED, Ltd. is pleased to announce that its group company, LOGISTEED Europe B.V., headquartered in the Netherlands, has opened a logistics center near Barcelona, Catalonia, Spain.

This center was established as a Central Distribution Center to streamline supply chain operations and support improved service delivery across Europe for one of our main customers, Johnson Controls – Hitachi Air Conditioning Europe. It is conveniently located 30 minutes from El Prat Airport and 40 minutes from the Port of Barcelona. It serves as a key point in the European logistics network, streamlining the storage of goods and their delivery to local logistics bases and individual delivery destinations within various countries in the region. Additionally, the introduction of pallet racks that can accommodate 41,000 pallets will enhance storage efficiency. The center is also environmentally friendly, reducing electricity usage for lighting by LED lighting, solar power generation, and skylights.
