

## **LOGISTEED Sponsoring the 31st KINEKO International Film Festival** **Contribute to the Development of the Next Generation** **through Ride Experience at Events**

LOGISTEED Group sponsors the 31st KINEKO International Film Festival, which will be held from October 31 to November 5 in the Futakotamagawa area of Tokyo, organized by the KINEKO Film General incorporated Association.

Started in 1992, this film festival is one of the largest international film festivals in Japan that can be enjoyed by everyone from children to adults. This year, under the main theme "PLAY & PRAY FOR PEACE - May the world be free of conflict," the festival aims to nurture children's curiosity and compassion through the power of film. Our Group supports the festival's mission to foster children's imagination and creativity and to cultivate diverse values through film, and we are pleased to sponsor the event again this year.

During the festival, in addition to films, there will be numerous hands-on events that parents and children can enjoy together. At the Tamagawa Riverbank venue, one of the festival locations, LOGISTEED Group will hold a Soap Box Car riding experience event titled "FUN AND SAFETY" from November 2 to November 4. This event is supported by Nippon International Soap Box Derby (NPO\_NSBD), which we support, and participants can experience riding the LOGISTEED VANTEC Nippon soap box car used by this year's Japanese representative in the gravity car race Soap Box Derby\*. Furthermore, Vantec Corporation, a member of our group, will hold an event where parents and children can learn about traffic safety by sitting alternately in the driver's seat of a 10-ton truck and experiencing the blind spots of trucks.

\*Soap Box Derby: A zero-emission car race where cars that do not emit any CO2 run down a slope using only the "power of the earth (gravity)" and compete for speed. Born in the United States in 1933, the race has been held annually in Akron, Ohio, for 90 years, sponsored by major automobile and tire manufacturers.

Our group has been promoting ESG management as priority measures, and will continue to support a variety of activities in the field such as Development of the Next Generation, or Traffic Safety.
