

**Awarded by the Minister of Land, Infrastructure, Transport and Tourism
for Initiatives Utilizing "SSCV®-Safety"**
~ Recognized for Contributions to Improving Driver Safety ~

On December 17, LOGISTEED, Ltd. was honored with the "Minister of Land, Infrastructure, Transport and Tourism Award" in the FY2024 Transport Safety Management Excellent Business Operator Awards. This recognition was given for the high evaluation of our group's safety operation management solution "SSCV®-Safety," which has been introduced within our company to contribute to the improvement of driver safety.

Mr. Ryōichi Okamoto, General Manager, Safety and Quality Control Management Office of LOGISTEED, Ltd.

This award system annually recognizes businesses, organizations, and individuals who have made significant achievements in transport safety management to support the construction and establishment of a safety culture among transport operators and continuous review and improvement efforts.

Our group's "SSCV-Safety" is a solution that prevents accidents caused by inattentive driving by visualizing "fatigue" and "stress" that drivers themselves are unaware, through AI analysis of biometric data before, during, and after driving, as well as driving data obtained from drive recorders and vehicle behavior. This award recognized our efforts to improve safety by building a system to analyze driver health and driving data in collaboration with industry and academia, and incorporating it into our safety system to reduce the number of accidents.

Our group upholds the philosophy of "Safety First" and promotes the safety slogan "Safety First" to ensure that each employee inherits the safety culture and contributes to providing safe and secure services.
