HTS Begins Operation of Mining Machinery Service Parts Center in Ami-machi, Ibaraki Prefecture —Supporting Global Supply by Providing New Added Value—

Hitachi Transport System, Ltd. (HTS) is pleased to announce that in July 2022, the company will start operation at mining machinery service parts center for Hitachi Construction Machinery Co., Ltd. in Ami-machi, Ibaraki Prefecture.

The center is equipped with a total of 10 overhead cranes, and it is specialized for handling heavy mining machinery service parts. In addition to the receiving space, it also has a dedicated shipping space, which enables efficient shipping by sending products directly from the center to overseas.

By providing new added value, the HTS group will support the global supply of service parts, and will contribute to the expansion of our customers' businesses.
