

Completion of Transportation for the “Nikko Moude SPACIA” Lead Car **— Cooperation in the 10th Anniversary Project of the Friendship** **Agreement between TOBU RAILWAY and Taiwan Railways —**

LOGISTEED, Ltd. cooperated in a commemorative project to display the lead car of TOBU RAILWAY’s “Nikko Moude SPACIA” at Taipei Station, carrying out the transportation from Japan to Taiwan.

TOBU RAILWAY CO., LTD. and State-Owned Taiwan Railway Corporation (TRC, Taiwan Railways Administration at that time) signed a friendship agreement on December 18, 2015. Since then, the two companies have promoted tourism exchange between Japan and Taiwan through mutual guest campaigns, collaborative PR events, and reciprocal facility visits.

This commemorative project marks the 10th anniversary of the agreement. As a symbol of Japan-Taiwan friendship, TOBU RAILWAY exhibited the “Nikko Moude SPACIA” at the Taipei Main Station of TRC. This is the first time a TOBU RAILWAY limited express train car has been exported overseas.

The transportation project included land transport from the vehicle depot in Tatebayashi City, Gunma Prefecture to Chiba Port, loading onto a ship, maritime transport to Taipei Port, and local transport and installation at the exhibition site in front of Taipei Station. Leveraging our group’s extensive experience in heavy cargo transportation, we managed the entire process meticulously to ensure the safe and efficient delivery of the railcar, which weighs several dozen tons.

Loading onto a ship at Chiba Port

Exhibition at the Taipei Station

The LOGISTEED Group will continue to pursue safety, efficiency, and environmental responsibility in project transportation—including railway carriages—and contribute to creating value for our customers through our global logistics network.
